Chapter 7

Field of Play setup - Target Rounds

7.1 Field of Play Layout

7.1.1 The field of play shall comply with the following provisions:

7.1.1.1 The field of play shall be established with corners of 90 degree angles. Each distance shall be accurately measured from a point vertically beneath the gold of each target face to the shooting line.
The tolerance for distances is at 90/70/60m ±30cm; at 50/40/30m ±15cm; at 25/18m ±10cm.

7.1.1.2 A waiting line shall be marked at least 5m behind the shooting line outdoors and at least 3m indoors. A media line shall be marked one meter in front of the waiting line.

7.1.1.3 Each target butt outdoors shall be set up at an angle of between 10 and 15 degrees from vertical and between 0 and 10 degrees indoors, but a line of target butts shall be set up all at the same angle.

7.1.1.4 The height of the centres of the target faces in a line of target butts should look straight at all times.

7.1.1.5 All athletes in a category shall be assigned to one field of play.

7.1.1.6 Whenever possible three athletes per target shall be assigned. If the field of play does not permit this, four athletes shall be the maximum number per target butt.

7.1.1.7 There shall be a mark on the shooting line directly opposite each target butt. There shall also be a number corresponding to that target butt 4 metres in front of the shooting line. If two or more athletes are shooting at the same target butt at the same time, the shooting position or shooting space for each one of them shall be marked on the shooting line. A minimum space of 80cm per athlete for indoor rounds, and a minimum space of 90cm per athlete for outdoor rounds shall be guaranteed. (Article 21.11.4. in Book 3 *)*

7.1.1.8 The field of play shall be divided into shooting lanes containing one to four butts. These lanes shall be marked by lines extending at right angles from the shooting line to the target line.

7.1.1.9 A line parallel to the shooting line shall be marked 3m in front of the shooting line.

7.1.1.10 Suitable barriers for the public shall be erected to keep spectators safe. Consideration should be given to any distractions caused to the athletes by movement of people, etc. behind the butts.
Outdoors these barriers shall be at least 20m away from the sides of the first and last target set at 90m. This distance may be reduced in a straight line to a minimum of 10m away from the ends at the shooting line. This shall maintain a margin of approximately 13m from the target line when the target butts are moved to 30m. The barriers shall be at least 10m behind the waiting line. The barriers shall be set at least 50m beyond the 90m target line. This shall create a safety zone increasing to 110m when target butts have been moved forward to 30m. The safety distance of 50m may be reduced if an adequate backstop, e.g. efficient netting, a bank or similar device, is erected (not a hedge or penetrable fence). The backstop shall be high enough to stop arrows which have just missed the top of the butt at 90m.
Indoors where the size of the hall dictates, suitable barriers shall be erected around the range to keep spectators back. These barriers shall be at least 10m from the ends of the target line and shall be at a minimum of 5m behind the waiting line. No spectators are allowed beyond the target line. Where the size of the hall does not require the erection of side barriers no spectators are allowed beyond the barrier situated behind the waiting line.
(see image 1: Range Layouts)

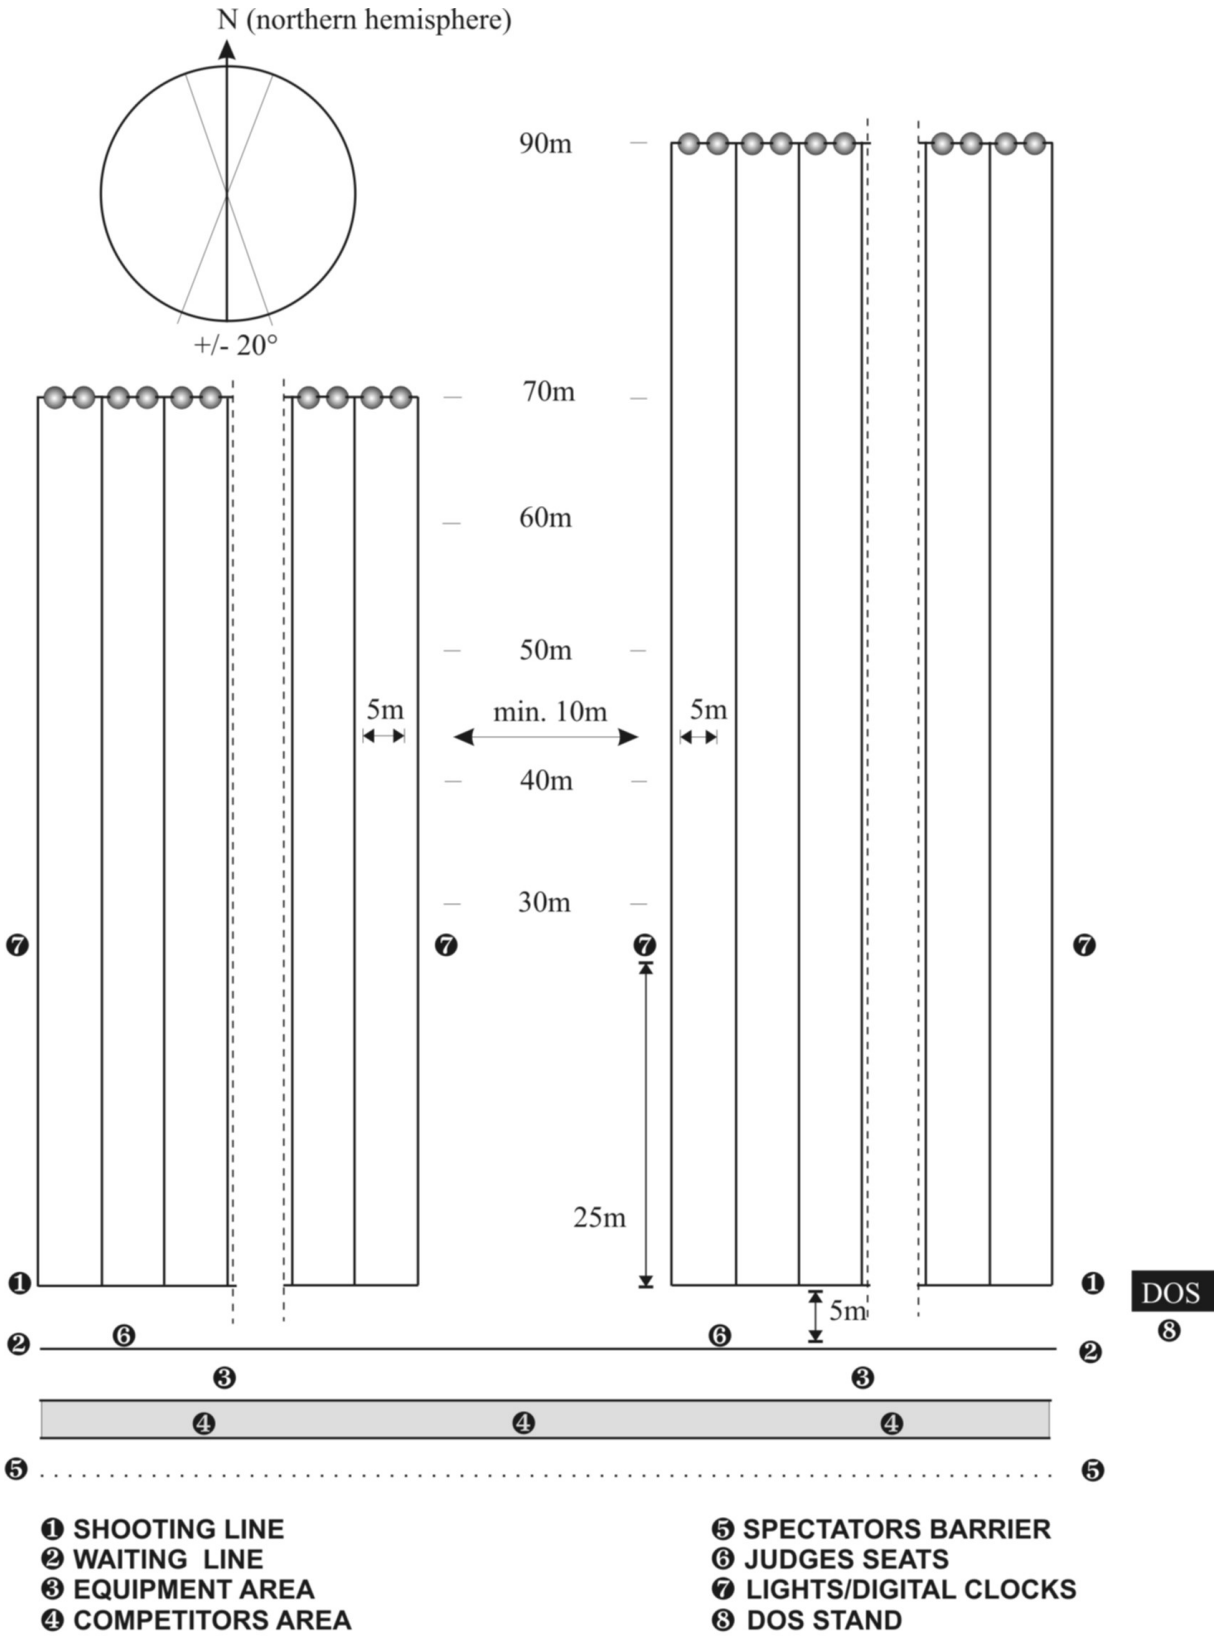

Image 1: *Range Layouts*

7.1.1.11 In the Elimination Rounds, target butts are to be arranged in closely set pairs.

7.1.1.12 For the Olympic and Compound Match Rounds a practice field shall be made available alongside the competition field, where athletes still in the competition may practice during the Elimination and Finals Round.

7.1.1.13 For the Team Rounds a clearly visible line shall be marked 1m behind the shooting line. This line shall be at least 3cm wide.

7.1.1.14 For the Team Rounds there shall be an athletes' area marked behind the 1m line, giving reasonable space for three athletes and their equipment and a coach's area behind the athletes' area. If space allows, there shall also be a small area marked for the Judge between the two competing teams.

7.2 Venue Equipment and Scoring Zones

7.2.1 Butts (buttresses)

The size of the front of the butt, whether round or square, shall be large enough to ensure that any arrow hitting the butt and just missing the outermost edge of the scoring zone remains in the butt. The arrows hitting shall remain embedded in the butt to allow proper scoring.

7.2.1.1 Butts shall be firmly attached to supports, which shall be pegged securely in the ground to prevent them from being blown or pulled over. Any part of the butt or its support likely to damage an arrow shall be covered. Care is necessary, particularly when more than one target face is placed on the butt, that arrows passing through the butt are not damaged by the support. See (see image 2: Outdoor target butt set-up) for outdoor and (see image 3: Indoor target butt set-up) for indoor target butt drawing.

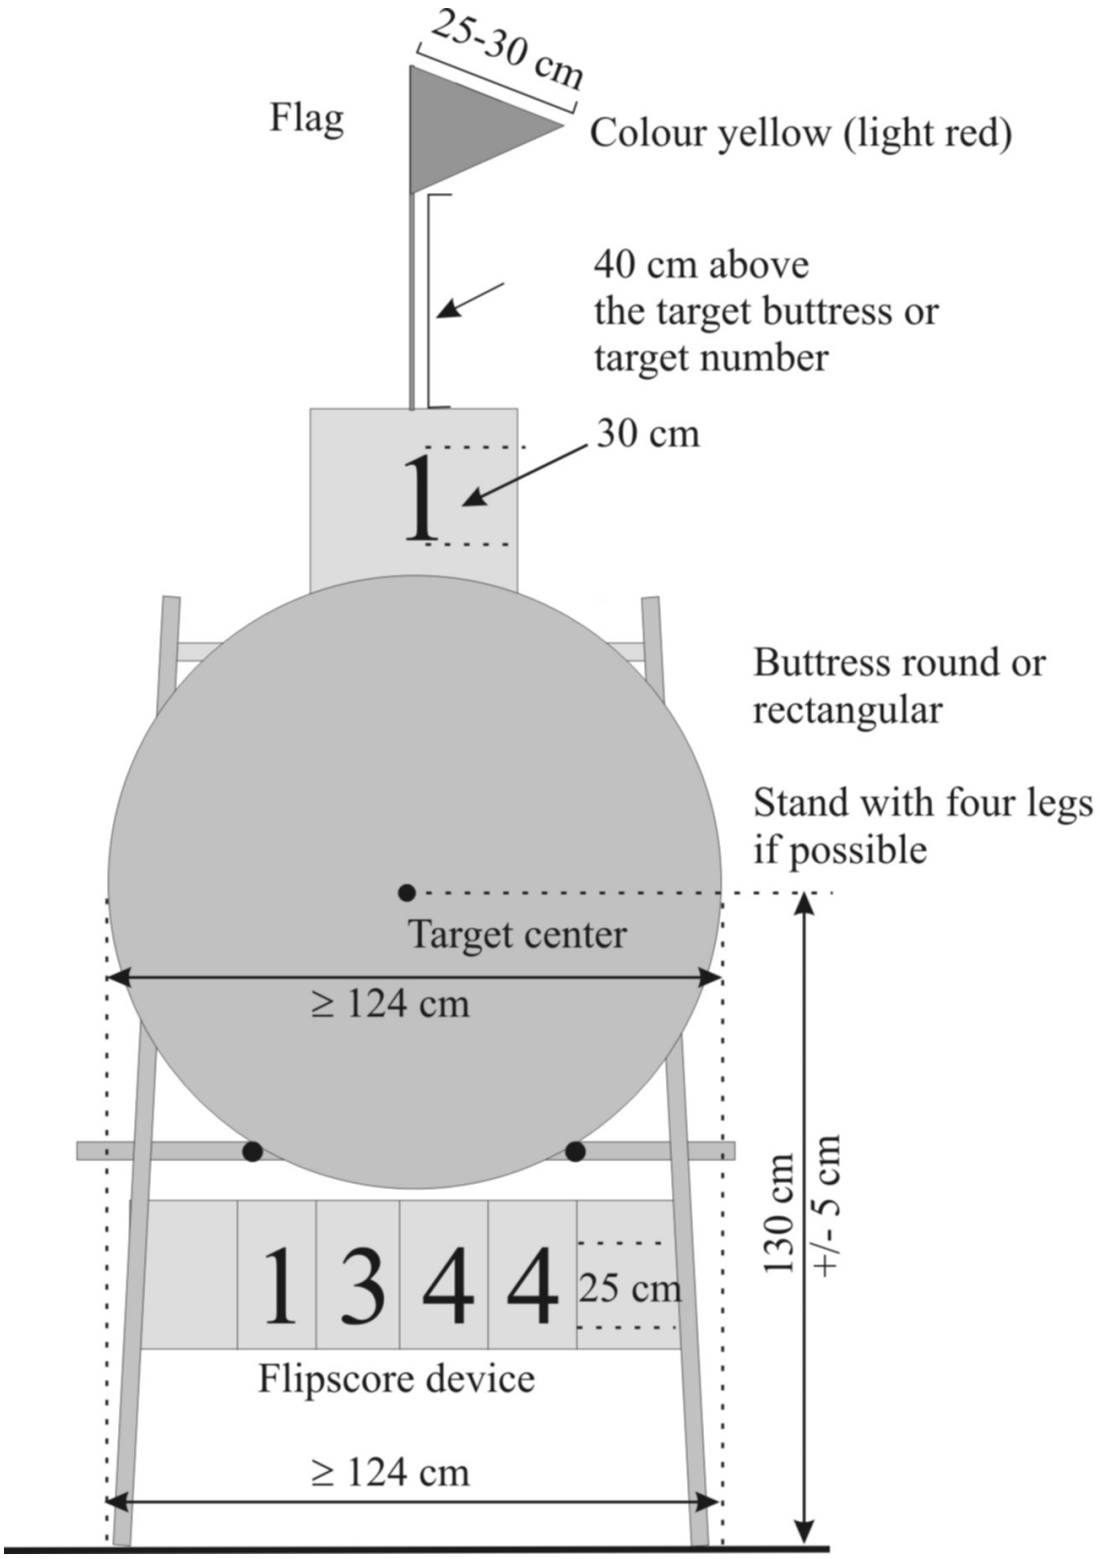

Image 2: *Outdoor target butt set-up*

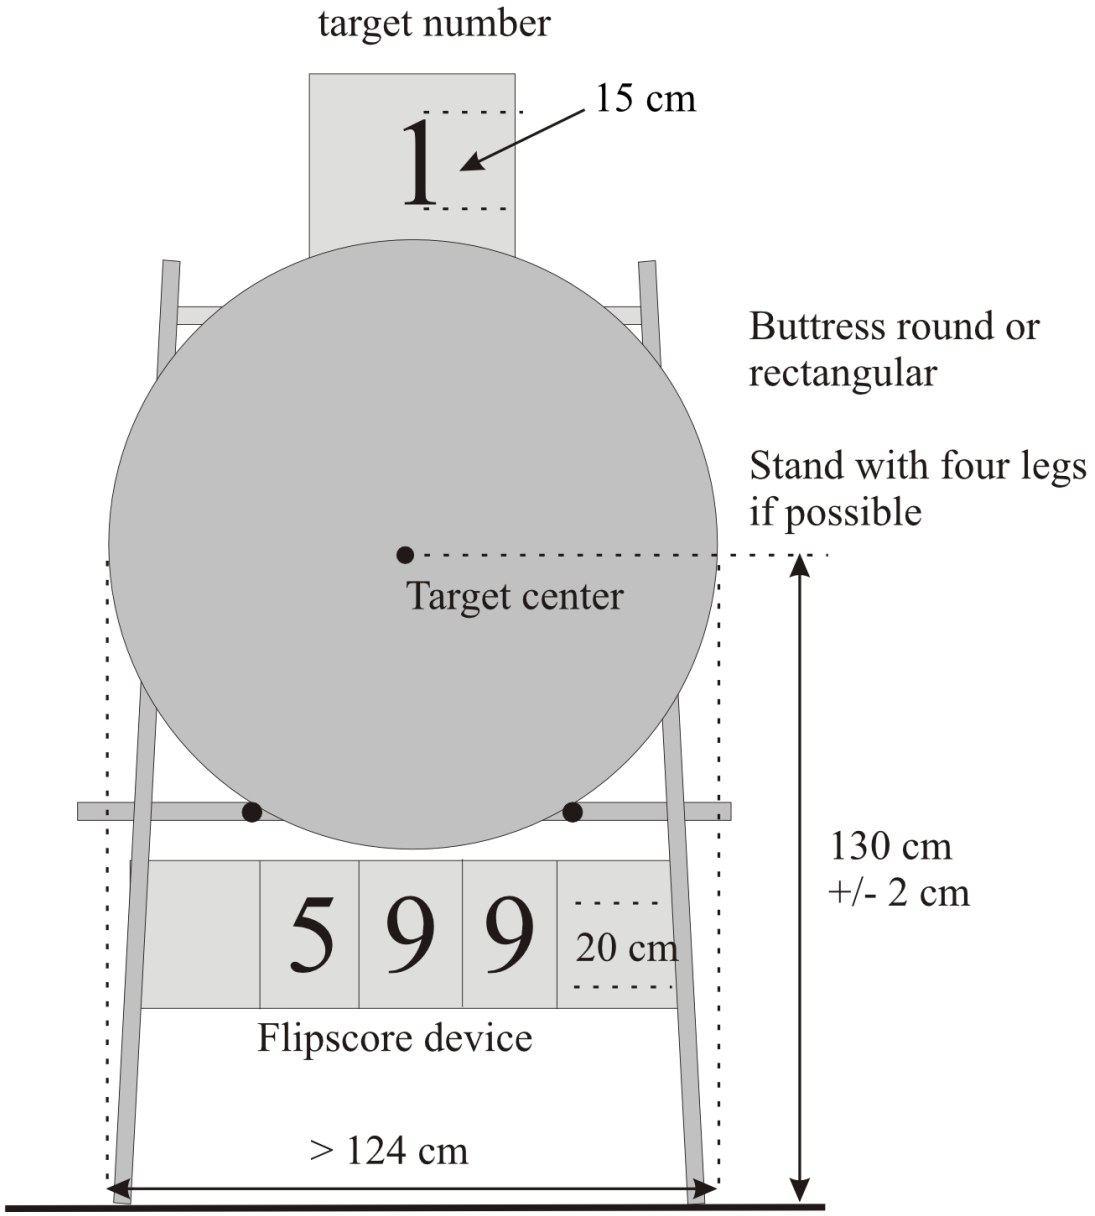

Image 3: *Indoor target butt set-up*

7.2.1.2 Each butt shall have a target number. These numbers shall be minimum 30cm tall (for Outdoor Rounds) and minimum 15cm (for Indoor Rounds). Target numbers shall be fixed above or below the centre of each target butt, so they are clear of the target face.

7.2.2 Target Faces

There are four outdoor target faces:

- The 122cm face, 122cm in diameter;
- The 80cm face, 80cm in diameter;
- The 80cm 6-ring face (for multiple set-ups with score zones 5-10);
- The Academic Round Hit/miss face.

There are 10 indoor target faces:

- The 60cm diameter face;
- The 60cm triangular triple face;
- The 60cm vertical triple face;
- The 40cm diameter face;
- The 40cm triangular triple face;
- The 40cm vertical triple face
- The 40cm-R triangular triple face;
- The 40cm-C triangular triple face;
- The 40cm-R vertical triple face;
- The 40cm-C vertical triple face.

Only target faces produced by a manufacturer licensed by World Archery shall be used at World Archery

competitions.

7.2.2.1 Description:

The 122cm, 80cm, 60cm and 40cm faces are divided into five concentric colour zones arranged from the centre outwards as follows: yellow (gold), red, light blue, black and white. Each colour is divided by a thin line into two zones of equal width thus making 10 scoring zones of equal width when measured from the centre of the gold:

- *6.1cm on the 122cm target face;*
- *4cm on the 80cm target face;*
- *3cm on the 60cm face;*
- *2cm on the 40cm face.*

The dividing lines shall be entirely within the higher scoring zone in each case. There are no dividing lines between light blue and black, nor between black and white. The line marking the outermost edge of the white shall be made entirely within the scoring zone. The width of the thin dividing line and the outermost line shall not exceed 2mm on the target faces. The centre of the target face shall be indicated by a small "+" (cross). The lines of the cross shall not exceed 1mm in width or 4mm in length. An inner 10 ring, (which is marked as an X on the score cards) of 6.1cm in diameter for the 122cm target face and 4cm in diameter for the 80cm target face, is required to help determine ties in ranking. For indoor compound events the 10 ring is 3cm on the 60cm face and 2cm in diameter for the 40cm face.

- *Outdoors the 80cm 6-ring face may be used at 50m, 40m and 30m. The rings have the same dimensions as the 80cm faces, but with the 4 to 1 scoring zones removed. The lowest scoring zone is the light blue 5.*
- *Indoors triple faces may be used as follows. (For the Indoor Match Round, the 40cm triple face shall be used. R- and C- vertical triple faces are mandatory for the World Archery Indoor Championships). They have the same dimensions as the World Archery 60cm and 40cm faces respectively, but with the 5 to 1 scoring zones removed. The lowest scoring zone is therefore light blue 6. Each set consists of three small faces on a white background arranged symmetrically in a triangular pattern with the centres respectively bottom left, at the top, and at the bottom right, or in a vertical row. The centres of the golds shall be approximately 32cm distant from each other on 60cm faces and 22cm distant from each other on 40cm faces. There is a distinction between regular triple faces and Recurve (R) and Compound (C) 40cm triple faces. The 40cm triple face (both triangular and vertical) will differ in the size of the 10 ring: the 40cm-R has a 40mm 10 ring, the 40cm-C has a 20mm 10 ring and the combined triple face has the two 10 rings.*

7.2.2.2 Scoring values and colour specifications:

7.2.2.3 Tolerance of measurement:

Outdoors the target face shall be measured using the diameter of each separate circle enclosing each of the scoring zones. The tolerance of each diameter shall not exceed ±1mm for the scoring zones 10, 9, 8 and hit zone and ±2mm for the other scoring zones measured through the centre.

Image 4: *1-10 Scoring Zones Target Face*

7.2.2.4 Academic Round Hit/Miss target face:

7.2.2.4.1 The Academic Round Target face is a Hit/Miss target consisting of two zones: a hit zone and a miss zone.

7.2.2.4.2 The hit-zone (spot) of the target face for 70m has a diameter of 24.4cm.

7.2.2.4.3 The colour for the hit-zone (spot) is yellow (Pantone 107U).

7.2.2.4.4 The colour for the miss-zone is red (Pantone 032U).

7.2.2.5 Material of target faces:

Target faces may be made of paper or any other suitable material. All faces used for the same competition category shall be uniform in colour and of the same material.

7.2.3 Size of target face at different distances and target set-up outdoors.

The 122cm target face shall be used for the distances of 90, 70, 60m (and 50m for U18 and 50+ Women). The 80cm target face shall be used for distances of 50, 40, 30m, except for the Standard Bow Round.

7.2.3.1 The centre of the target face shall be 130cm above the ground as measured from ground level. The tolerance of measurement shall not exceed ±5cm.

7.2.3.2 When using a triangular multiple-centre face (5 or 6-ring) set-up at 50m, 40m and 30m or the four-centre face setup the maximum distance above the ground of the centre of the upper face(s) shall be 172cm and the minimum distance above the ground of the centre of the lower faces shall be 90cm. The minimum distance between the scoring zones of two faces at the same height shall be 2cm.

7.2.3.3 When using a three-centre face (5-ring) horizontal set-up at 30m, the centres of the faces shall be at 130cm (±5cm) above the ground. The minimum distance between the scoring zones shall be 2cm.

7.2.3.4 Setup of target faces for Compound Match Play:

80cm 6-ring target faces shall be placed on the target as follows:

- *For the Eliminations Round (no alternating shooting), one face shall be placed horizontally on the left side of the centre (three arrows to be shot by the left athlete) and one on the right side of the centre (three arrows to be shot by the right athlete);*
- *For the Finals (alternating shooting), one face shall be placed on each target;*
- *For the Team and Mixed Team, each team shall have one target with two faces set up horizontally on the target, one face for three arrows (Team) or two arrows (Mixed Team) (see (see image 5: 2 x 5-10 Scoring Zones Target Face)). Athletes on a team may elect which face to shoot provided that each face has either three arrows (Team) or two arrows (Mixed Team).*
- *For the Team and Mixed Team, the shoot-off will be shot on a single target face.*

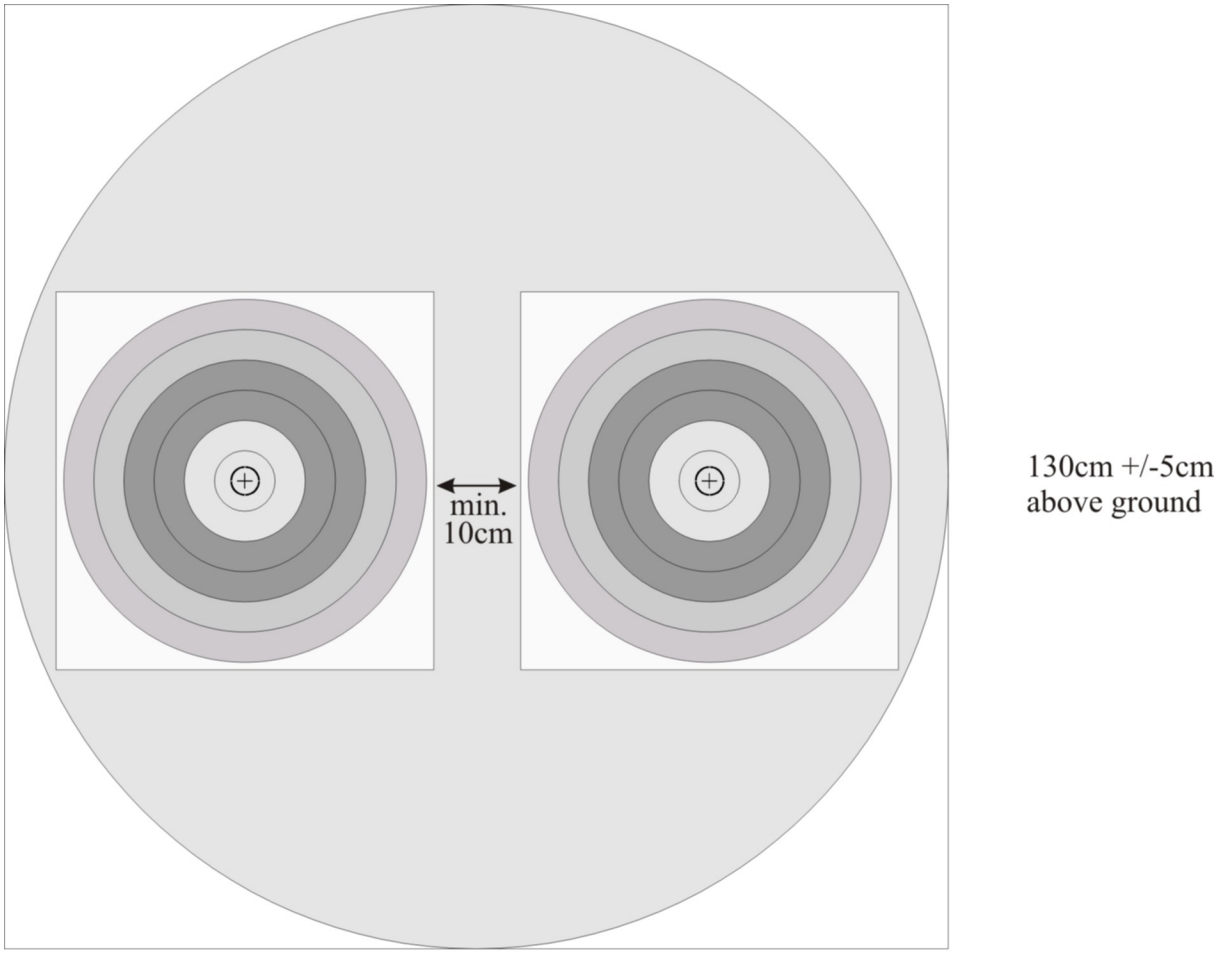

Image 5: *2 x 5-10 Scoring Zones Target Face*

7.2.3.5 The use of single or 6-ring faces in all other competitions is the choice of the organisers, who can allow the athletes in the same class and division to shoot on a different type of face. For World Championships and Other International Events, the 6-ring face is mandatory except for W1.

7.2.4 Size of target face at different distances and target set-up indoors. For indoor shooting at 25m, the target face of 60cm shall be used. For the distance of 18m, the target face of 40cm shall be used.

7.2.4.1 Rounds and faces.

For the Indoor Match Round, the triple 40cm faces shall be used. In the Elimination and Finals Rounds the faces shall be set in pairs on each target butt. Vertical triple faces shall be mandatory for the World Archery Indoor Championship. The use of single or triple faces in all other competitions is the choice of the organisers, who can allow the athletes in the same class and division to shoot on a different type of face.

7.2.4.1.1 The set-up for a single face or a pair of faces.

The centre of the single face or the centre of the middle face of the vertical triple face shall be 130cm above the floor. When using triangular triple faces the height refers to the two lower centres of the triple faces. When using a pair of faces, the minimum distance between scoring areas of the two faces shall be 10cm. For 60cm faces the distance shall be a minimum of 2cm between the two scoring zones.

7.2.4.1.2 Set-up for four 40cm single or triple triangular faces.

In case of four 40cm faces, the maximum height of the centres of the upper faces shall be 162cm above the floor. The centres of the lower faces shall be a minimum of 100cm above the floor. In the case of triple triangular 40cm faces, the maximum height refers to the highest centres of the triple faces and the minimum height refers to the lowest centres of the triple faces. The minimum distance between the scoring zones of two faces at the same height shall be 10cm. Each face shall be placed in its quarter of the target butt (see (see image 6: 4 x 4 40cm Target Face for Indoor) and (see image 7: 4 x 4 Triple Triangular Face for Indoor)).

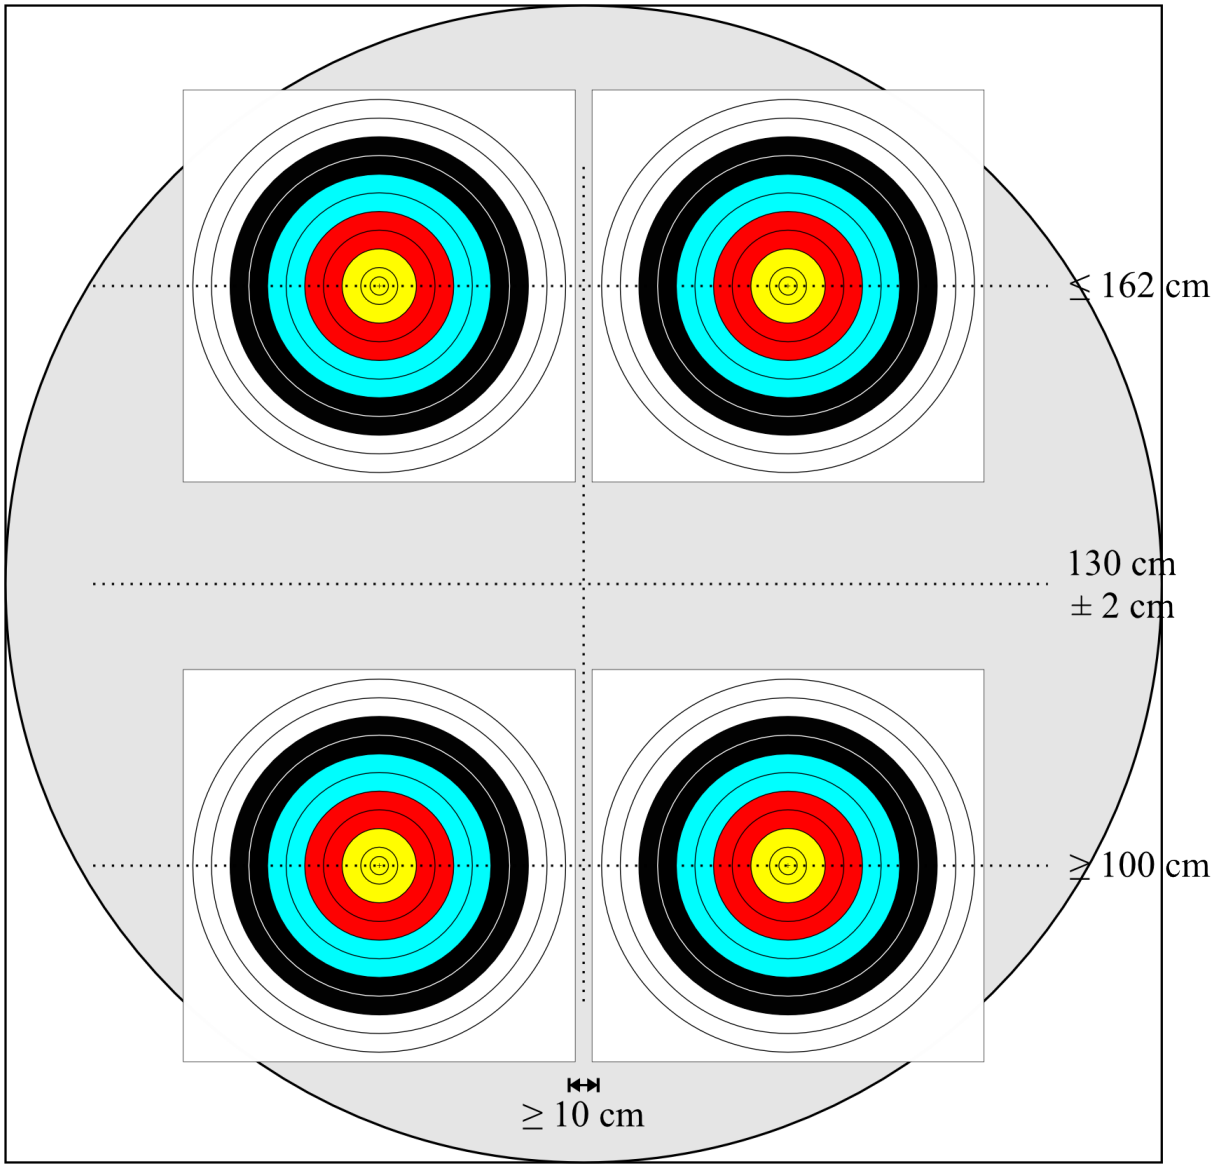

Image 6: *4 x 4 40cm Target Face for Indoor*

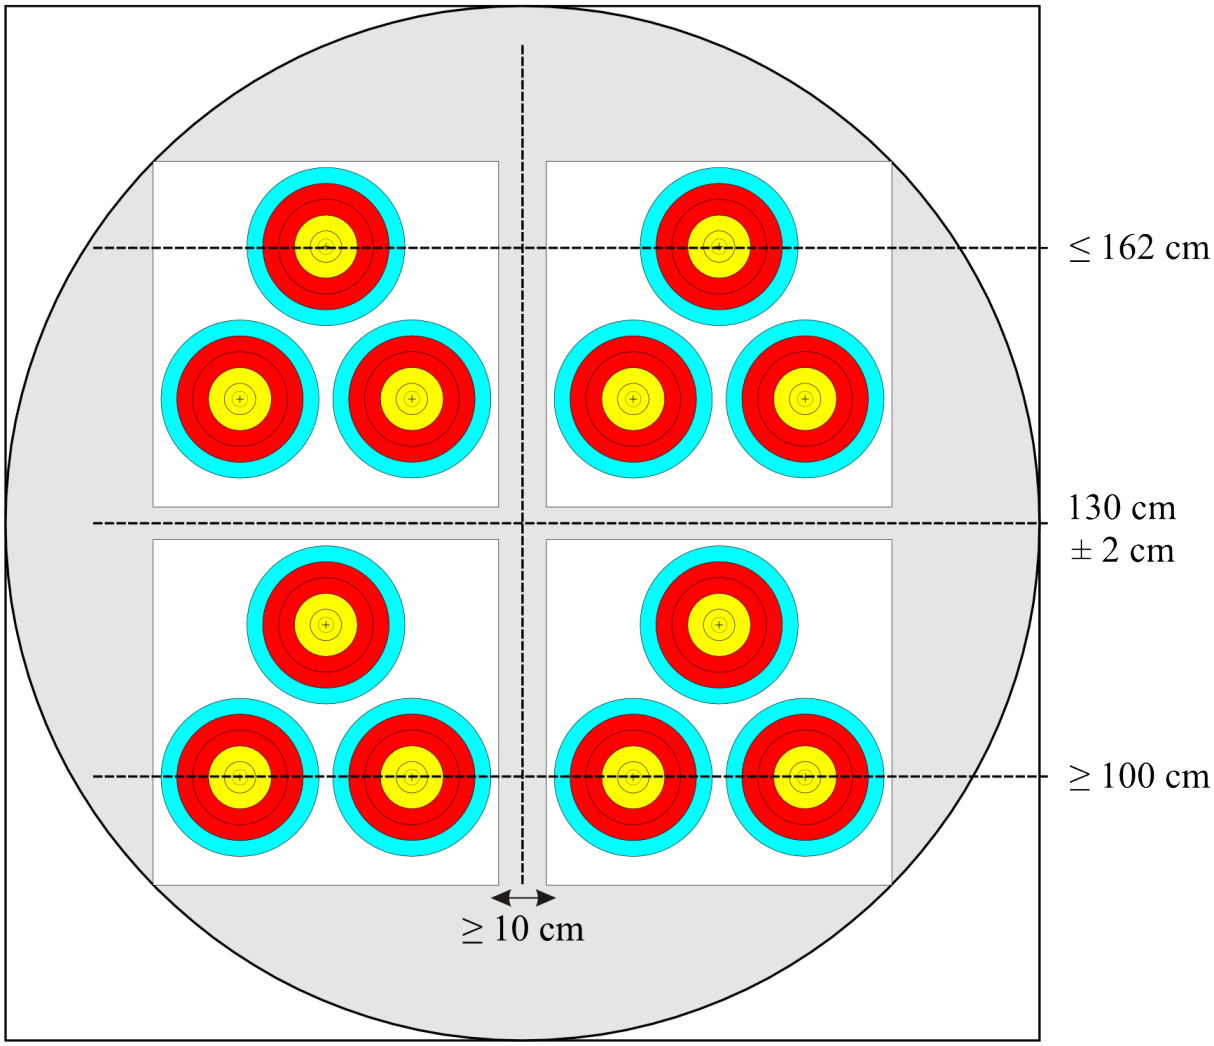

Image 7: *4 x 4 Triple Triangular Face for Indoor*

7.2.4.1.3 Set-up for four and two 40cm vertical triple faces.

When using four vertical triple 40cm faces, the centres of the middle faces shall be 130cm above the floor. With four vertical triple faces, there shall be a space of at least 10cm between the scoring zones of the second and third column, and a maximum distance of 2cm between the scoring zones of columns 1 and 2, and columns 3 and 4.

With two vertical triple faces (individual and team event), there shall be a space of minimum 25cm between the scoring areas of each column.

With one vertical triple face set-up horizontally (team shoot-off), the centre of the vertical triple face shall be 130cm above the floor.

7.2.4.1.4 The tolerance of measurement shall not exceed ±2cm for the positioning of the target faces.

7.2.5 Time Control Equipment.

Acoustic and visual.

The Director of Shooting (see Article 10.1.1.) shall control:

- The start and end of each time limit with a whistle or another audible indicator;
- Each time limit with digital clocks, lights, flags, plates or any other simple visual indicator in addition to the audible signal referred to above.

7.2.5.1 In the event of a small discrepancy between the acoustic and the visual time control equipment, the acoustic time control equipment shall take precedence.

7.2.5.2 The following equipment can be used:

- *Lights;*
  - *The colours of the lights shall be red, yellow and green in that order with the red at the top. The lights shall be synchronized and at no time shall two different colours be on at the same time. In Championships, the lights shall be linked with the acoustic equipment so that the first sound of the acoustic equipment is simultaneous with the light turning red and the digital clock reaching zero.*
- *Digital Clocks;*
  - *When timing is controlled by the use of digital clocks the figures on the clock shall be a minimum of 20cm in height and shall be able to be clearly read at a distance of 100m. They shall be able to be stopped and reset very quickly as and when required. The clock shall function on a countdown principle. All other requirements shall be the same as for lights.*
  - *When digital clocks are used, lights are not mandatory.*

- *If both systems are used, they must be synchronised. If there is a discrepancy, the digital clock takes precedence.*

- *The visual signals are to be placed on both sides of the field and, if necessary, in a clear lane between target butts, at any distance shorter than 30m, so they are visible to all athletes, both left and right-handed, on the shooting line;*
- *Match play indicators;*
  - *When shooting the alternating match play, there shall be separate green/red lights, countdown clocks, or other visual signals for each athlete to indicate whose turn it is to shoot.*
- *Emergency Equipment;*
  - *When the time limit is controlled by electrical equipment, plates, flags or other manual indicators shall be available in case the other equipment fails.*
  - *When the time limit is controlled manually by means of plates, these are a minimum of 120cm by 80cm in size. They shall be securely mounted to resist any wind and shall be easy to turn quickly to show either side. One side of each plate shall be green and the reverse side of each plate shall be yellow.*
- *Lights or digital clocks and emergency equipment are mandatory for International Events.*

7.2.6 Miscellaneous Equipment

The equipment outlined in the bylaws below is mandatory at International Events and is recommended for other important tournaments.

7.2.6.1 Athletes' numbers shall be worn by each athlete.

7.2.6.2 A device to indicate the order of shooting if the athletes do not all shoot at the same time. The letters shall be large enough to be read by all athletes from their respective shooting positions.

7.2.6.3 A scoreboard for cumulative totals after each end, for at least the first five athletes of each category and the scores for the qualification cut.

7.2.6.4 In the Olympic, Compound and the Indoor Match Round a name plate carrying the athlete’s number or name in the individual events, or the official acronym of the Team, shall be displayed in front of the shooting line.

7.2.6.5 In the Elimination Round a flip-score device to show three digits shall be displayed below each butt.

7.2.6.6 In the Finals Round, there shall be one remotely-operated scoreboard, one for each athlete (or team), with spaces for the scores of three individual arrows and the total score or sets for each match. There shall also be provision for the athlete’s name and country, or the country in the team competition.

7.2.6.7 Blinds for use in the Finals Rounds may be placed near the butts. They shall be used by Judges, scorers, and athletes' agents.

7.2.6.8 Outdoors wind flags, of any light material and easily visible colour (such as yellow) to serve as wind indicators, shall be placed above the centre of each butt. They shall be placed 40cm above the butt or the target number, whichever is higher. The flags shall measure not more than 30cm and not less than 25cm in any dimension.

7.2.6.9 Outdoors windsocks on both sides of the field and one in the middle when there is a split between the two sides. The windsocks are to be placed between 2.5 and 3.5m above the ground, between the shooting line and the line of targets, and shall be official World Archery windsocks.

7.2.6.10 A raised platform with seating facilities for the Director of Shooting.

7.2.6.14 A small diameter television camera may be installed in the centre of the butt/target face other than when a shoot-off is occurring.

Chapter 8

Field of Play setup - Field Archery

8.1 Course Layout

8.1.1 The field course shall be arranged so that the shooting positions and the targets can be reached without undue difficulty, hazard or waste of time. Field courses should be as condensed as possible.

8.1.1.1 The walking distance from the central (assembly) area to the furthest target should be no more than 1km or 15 minutes normal walking.

8.1.1.2 The course makers shall prepare safe paths for Judges, medical personnel and to allow for transportation of equipment round the course(s) while shooting is in progress.

8.1.1.3 The course(s) shall not be positioned higher than 1800m above sea level and the maximum difference between the highest and the lowest point in a course shall not be more than 100m.

8.1.1.4 The targets shall be laid out in such order as to allow maximum variety and best use of the terrain. In the Finals Round two butts shall be placed side by side at each target on which a 60cm or 80cm target face is placed.

8.1.1.5 At all targets, one shooting peg for each distance shall be placed in such a way as to allow at least two athletes to shoot at the same time from either side of the shooting peg.

8.1.1.6 All shooting pegs shall be marked with the distance when marked distances are to be shot. The shooting pegs shall have different colours, corresponding to each group of categories as follows:

- *Blue for the Barebow, U18 Recurve and U18 Compound;*
- *Red for the Recurve and Compound;*
- *Yellow for the U18 Barebow.*

8.1.1.7 The tolerances are:

- *For distances 15m or less ±25cm;*
- *For distances between 16-60m ±1m.*

However, the distances given in 8.1.1.10. Unit for Marked Course may be adjusted by ±2m. The correct distance shall be marked on the shooting peg.
The distance should be measured in the air approximately 1.5-2m above the ground. All kinds of measuring equipment can be used as long as it satisfies the tolerances.

8.1.1.8 The butts shall provide a margin to allow all scoring arrows to be in the butt. At no point may any target face be less than 15cm from the ground. In all instances, regardless of the terrain, the buttress should be placed perpendicular to the athlete's line of sight from the shooting peg in order to present the target face's full picture.

8.1.1.9 Unit for Unmarked Course

Number of targets 12 targets in a unit Min- Max #	*Diameter of Field Faces in cm*	*Yellow Peg Barebow U18 Longbow* (in metres)*	*Blue Peg Recurve U18 Compound U18 Barebow Traditional (in metres)*	*Red Peg Recurve and Compound (in metres)*

8.1.1.10.1 The set distances may be adjusted with ±2m if needed, however the new measured distance shall be displayed on the peg. On marked rounds a double 60cm target face setup is recommended.

8.1.1.11 Elimination Rounds

The Elimination Round consists of 6 marked targets per match. Each set of 6 targets will have a mix of all face sizes (20/40/60/80) and all distances will be pegged (short/medium/long). Organisers will lay the course with consideration to the venue, the terrain and the lay of the land.

8.1.1.12 Finals Rounds (and Team quarter-finals)

The semi final and final consist of four marked targets in each match with marked distances. During the finals the targets can be placed at the organiser wishes taking into consideration the terrain, lay of the ground and venue. All target faces (20/40/60/80) must be used and there should be a mix of short, medium and long distances.

8.1.1.12.1 In the Mixed Team when shooting at 20cm face, each team will shoot at a 2x2 set up, one arrow in each.

8.1.1.13 All targets shall be numbered in succession from 1 to 24. The numbers shall be be clearly visible to archers and clearly identify the target number. They shall be placed 5-10m before reaching the shooting pegs for that target.

8.1.1.14 The target numbers shall also function as the waiting area for the groups waiting for their turn to shoot. The members of the group shooting that target can be forward of the number board to assist with shading and spotting as necessary. From the waiting area it should be possible to see if anybody is standing at the peg.

8.1.1.15 Clearly visible direction signs indicating the route from target to target shall be placed at adequate intervals to ensure safe and easy movement along the course.

8.1.1.16 Suitable barriers shall be placed around the course, wherever necessary, to keep spectators at a safe distance while still giving them the best possible view of the competition. Only those persons having the proper accreditation shall be allowed on the course inside of the barriers.

8.1.1.17 The assembly area should contain:

- *A communication system allowing contact with the chairperson of the Tournament Judge Commission and the organisers;*
- *Adequate shelter for team officials;*
- *Separate shelter for the Jury of Appeal and the chairperson of the Judge Commission;*
- *Guarded shelter for the athletes gear and spare equipment;*
- *Practice targets on the competition days near the assembly point(s) for the athletes;*
- *Refreshment facilities;*
- *Toilets.*

8.1.1.18 The course(s) shall be completed and ready for inspection no later than 16 hours before the shooting starts. At World Championships they shall be ready along with details of any modifications to those courses for use as Elimination or Final Rounds, no later than the morning of two days before the shooting starts.

8.2 Venue Equipment and Scoring Zones

8.2.1 The Field Face.

There are four field target faces :

8.2.1.1 Description.

The face consists of a yellow centre spot and four equal scoring zones.
The yellow zone is divided into two scoring zones.
The inner ring is scored as 6 and the outer yellow zone as 5.
The two zones shall be divided by a black line of maximum 1mm in width. The rest of the face shall be black. The four scoring zones shall be divided by white lines of maximum 1mm in width. There are no dividing lines between yellow and black.
Any dividing lines shall be in the higher scoring zones. The centre of the target face shall be indicated by a small "+" (cross). The lines of the cross shall not exceed 1mm in width and 4mm in length.

9.1.1.13 The 3D course(s) shall be completed and ready for inspection no later than 16 hours before the shooting starts. At Championships they shall be ready no later than the morning of two days before the shooting starts, except for modified courses.

9.2 Venue Equipment and Scoring Zones

9.2.1 The 3D Targets.

The courses are unmarked only. 3D Targets are used. The targets are three dimensional using a wide variety of forms of varying sizes. The number of targets used, their respective size and the size of the scoring zones are not standardised. The dividing lines of the scoring zones are within the higher scoring area.

The colour of the targets varies according to the target chosen.

9.2.2 Scoring zones.

The target is divided into four scoring zones (11, 10, 8 and 5).

An arrow touching the dividing line between two scoring zones or the border line of the scoring area shall score the higher value.

- *11 points the small circle in the centre of the 10 ring (about 25% of the 10-ring zone);*
- *10 points the larger circle within the vital area;*
- *Eight points vital area outside the 10-point circle;*
- *Five points remaining body colour zone;*
- *A hit in the horn or the hoof, or other defined non scoring area, not touching the body colour zone, a glance-off or any other miss counts as a miss (M). A hit in the tail or wings of a bird target is a scoring arrow. An arrow passing through the horn or hoof or other defined non scoring area, but touching a scoring zone, will score the value where it touches the scoring zone. An arrow passing through the horn or hoof or other defined non scoring area, but not touching a scoring zone will score a miss (M).*

9.2.3 Target pictures.

About 5-10m from the shooting peg, a post is placed showing the target picture of that target including the lines and the position of the respective scoring zones.

10.2.5 The Director of Shooting, in consultation with the Judges, has authority to extend the time limit in exceptional circumstances. Any such special ruling introduced shall be announced to the athletes before having effect. In such cases, the final results list shall include the special ruling and the reasons for it. When visual time controls are in use, the 30 seconds warning remains unchanged.
